

Differentiation Prompt & Lesson Shell

One prompt to plan for your whole class at once, and a place to put what comes back.

Part 1: Differentiation Prompt Framework

One prompt, three groups, one shared target.

The Prompt

Act as a [grade level] instructional coach. I have a [subject] class of [class size] students split into three anonymous performance groups. The shared learning target is [objective]. I need a structured [class length] lesson framework with three simultaneous tracks: Group A ([# students], below level) gets a scaffolded reteach task using simplified text and guided graphic organizers. Group B ([# students], on level) gets a direct application task aligned to the standard. Group C ([# students], advanced) gets a higher-order extension task requiring analysis or evaluation. Format the output as a timed lesson shell with clear group labels, task descriptions, and materials needed. Do not include student names or identifying information.

What Goes in the Brackets

- [grade level] / [subject] — the subject and grade you teach
- [class size] / [# students] — how many kids total, and how many land in each group
- [objective] — the one thing every group is working toward, even though the task looks different for each
- [class length] — how much time you actually have

Where This Goes Wrong

Don't run three separate prompts, one per group. You'll get three tasks that don't actually connect to each other, and nothing tying them back to the same target. One prompt, three tracks, same objective — that's what keeps the whole thing coherent.

Quick Check Before You Use It

- ☐ Every group's task connects back to the same objective
- ☐ The timing adds up, transitions included
- ☐ No placeholder brackets left in the output

Part 2: Remediation Lesson Shell

Run the prompt first, then drop what comes back into here.

This isn't a new document to build, it's just a place to land what the AI gives you, so it's actually usable instead of sitting in a chat window. Paste each group's task, materials, and time into its section below.

Group A — Below Level	Fill in after running the prompt
-----------------------	----------------------------------

Task	
Materials Needed	
Time	

Group B — On Level	Fill in after running the prompt
Task	
Materials Needed	
Time	

Group C — Advanced	Fill in after running the prompt
Task	
Materials Needed	
Time	

Last Look Before This Goes Live

- ☐ Timing across all three groups fits your actual period
- ☐ No leftover brackets or placeholder text
- ☐ Nothing in here identifies a specific student
